

LABORERS AT Y. M. C. A. BUILDING

SEWER TROUBLES

ARE HANDICAPPED BY CONDITIONS

At Times the Odor From Clogged Up Sewer

RENDERS WORK IMPOSSIBLE

Tenants and Pedestrians Complain of Odor From Filth.

Workmen were given the task of cleaning up the basement, of the Worthington building, which is now a part of the Y. M. C. A., Friday morning, and flushing the branch sewer leading into the Market street sewer in order to temporarily rid the building of the sewerage and horrible odors which have infested the place as a result of the old sewer, known as the Sharp sewer, becoming clogged, forcing the sewerage back into the basement of the Worthington block, as it has done off and on throughout the summer.

The awful odor arising from the accumulated mess in the basement has at times been so overpowering that the corner was shunned by pedestrians as if the plague existed there, and some of the tenants of the Worthington block have threatened to vacate unless a remedy is found without delay.

The Worthington block was originally drained by a private sewer constructed at great cost, and which at the present time is said to contain 22 taps. The upper end of this sewer has long caused trouble, and is said to be almost out of commission at the present time, and efforts to flush it have been very unsatisfactory.

A tap was made into the Market street sewer several months ago, but the depth was so shallow that the sewerage from the Worthington building could not be taken care of in the proper manner, and those in charge have been waiting and hoping for relief by means of the new, and somewhat notorious Market street sewer which has been under course of construction off and on for months.

The heating plant of the Y. M. C. A. is ready to go in, but the drainage is reported lacking, and this must wait the completion of the Market street sewer. Each day the situation becomes more deplorable for lack of proper outlet, and as the new Market street sewer has been abandoned until more money is furnished with which to carry on the work, the sanitary condition in the Worthington block continues to grow worse, and the point is said to have been reached when actual work on the Y. M. C. A. is being held up until the sewer is completed and an outlet furnished.

Last Obstacle Removed
Railroads Will Unite

The last obstacle in the way toward the building of a branch road near Chillicothe, connecting the B. & O. S. W. and the C. H. & D. railroads has been removed in the condemnation suit of the B. & O. S. W. against Charles Snyder, wherein Snyder was allowed \$3000 for two and one-half acres of land.

The connecting link was ordered that the heavy freight of the B. & O. S. W. might be transferred to the C. H. & D. at Chillicothe and hauled through this city to the B. & O. here, and thence down to Midland

City, eliminating a number of steep grades and giving the main track greater freedom for the fast trains.

The full right-of-way for the new connecting branch is now in possession of the B. & O. S. W. and work of building the spur will commence at once. This may mean the building of a short branch from the C. H. & D. in this city, to the B. & O. S. W., probably from a point near the Ice Factory across Paint creek to the B. & O., or else paralleling the C. A. & C. from Court street to near Lloyd's Elevator.

The last heard of Mr. Carswell, he was just as sure as black is black that the road would (eventually) be a go. He has maintained this so

The Grasshopper railroad has not been converted into a traction for almost a year, and it has been at least ten months since the D. T. & I. railroad was "electrified". It is supposed that this road will receive an electrical turn when it is sold at auction next month.

The Dayton to Washington line, or extension from Xenia, is still undecided. Like the other proposed roads, the engineer's stakes are still sticking by the roadside trying to look dignified and encourage the people along the route.

A charming affair of the early autumn was a Kensington, at which Mrs. Ralph Penn entertained forty society matrons and girls Wednesday afternoon.

The handsome Penn home, showed artistic embellishment in the rich shades of autumn. In the reception hall were stately hydrangeas and palms. Scarlet and yellow canneas were brilliantly effective in the large double parlors and a scarlet color scheme beautifully carried out in graceful clusters of sylvia and blazing candies in the dining room.

Mrs. Ray F. Zaner poured at the exquisitely appointed tea table, Mrs. D. H. Van Winkle serving ices at the opposite side.

Also assisting in the delightful hospitalities of the afternoon were Mesdames Eva Penn, W. W. Hamilton, Scott Hopkins, Herman Price and John McFadden.

Dunbar's idea, however, has always been that a Lyceum entertainment should do something more than entertain and that it should leave behind something more than a record.

The unique organization known as The Hussars meet two demands of the present-day Lyceum—military splendor and action and the rollicking spirit and dash of the college glee club. It has been organized and the programs produced under the personal direction of the famous special company organizer, Mr. Ralph Dunbar.

The Hussars are also referred to as "a singing band" and a "brass choir." They are beautifully costumed and, besides numerous up-to-date songs with choruses and action, presents an original sketch called "The Hussars" in which several intensely amusing situations occur together with an exhibition drill.

It is something decidedly new and striking in Lyceum concerts, and is bound to make a hit.

SOME RAILROAD CHANGES

Of Local Interest

EFFECTS TO LOCAL LINES

Quietly, without publicity, and almost secretly, the Baltimore & Ohio railroad threw a large force of engineers into the hills and vales of Lawrence county, Ohio, several months ago, and today possesses all preliminary surveys, estimates, locations, descriptions, etc., of that route to be covered by the proposed Huntington-Northern railway, thereby scoring a beat on the several other great railway systems, to whose advantage a direct connection between the Ohio river and the Great Lakes is manifest at a glance, and securing for themselves a tremendous advantage should a road building race ensue with the Chesapeake & Ohio railroad, another contender for the heavy coal and timber traffic of Southern West Virginia.

It is even rumored, and these rumors drift remarkably straight from authentic sources, that the Baltimore & Ohio has silently placed agents and representatives in the field, who are quietly buying up under many and varied excuses the proposed new right of way and securing options on all available land at the several points along the route, where, in the event of the road being built, would be most suitably located stations, sidetracks, spurs, yards, terminals and other holdings necessary to the operation of the short line.

The Baltimore & Ohio must have a short line connection between the Ohio river and the C. H. & D. to handle with any degree of profit their agreed tonnage in the acquisition of the Elkhorn road in the Consolidation coal fields of northeastern Kentucky. Three million tons of coal must come out of these recently opened coal fields over the Elkhorn road each year, according to the purchase contract. This immense tonnage will come over the Big Sandy division of the Chesapeake & Ohio to Cetlettsburg and unless the Huntington-Northern is built, must be handled over the Chesapeake & Ohio main line to a delivery to the C. H. & D. at Cincinnati.

This is a short line between Huntington and Jackson on the C. H. & D. absolutely necessary to the Baltimore & Ohio. Unless it is built, the Elkhorn road, almost buried way off in the mountains hundreds of miles from the nearest possible Baltimore & Ohio Lake connection, is a foolish expenditure, a bad investment, al-

most an utter loss. Many months ago the C. H. & D. quietly secured options on the terminal right-of-way at Jackson and for several miles out of that city. This was followed by the opening of offices by their engineers in Jackson and a rough survey of the route through to the river. Also several other proposed routes were surveyed.

According to the engineers, the Symmes Creek valley to Huntington was the most practicable. The Baltimore & Ohio engineers came to Jackson and opened offices under the leadership of the chief engineer of the entire system. Working in conjunction with the C. H. & D. engineers, they sent out numerous crews into the Symmes Creek Valley.

Greenfield's New Church Almost Ready for Roof

The new M. E. church, taking the place of the beautiful edifice destroyed by fire over a year ago, is rapidly nearing a stage of completion ready for the roof, and when finished will be superior in many ways to the \$75,000 structure devoured by flames.

No expense is being spared to make the church as near fire proof as possible, thus eliminating the dangers which caused the building's destruction.

It is now believed that early in the spring the handsome edifice will be ready for dedication. The enterprise shown by the church membership in raising funds to complete the new church, is certainly commendable, as this is the third or fourth time the Greenfield M. E. church has fallen before the fire fiend.

Imperial Degree Staff In Mammoth Parade

Imperial Degree Staff of Temple Lodge, I. O. O. F., which left this city on a special train Wednesday for Indianapolis, where the Sovereign Grand Lodge is in session, took part in one of the greatest parades Indianapolis has ever witnessed, Wednesday night.

The parade was nearly four miles in length, and composed of nearly 25,000 Odd Fellows from all over the land. Fully 150,000 people witnessed the big demonstration. The men were in line for three hours, and traffic was blocked on some of the streets for five hours.

In the parade there were more

than sixty bands and 150 floats, fifteen of which were of pretentious design, and through the entire two hours the top of the Odd Fellow building was kept ablaze with a display of fireworks that could be seen from all portions of the city. Hundreds of dollars worth of bombs and sky rockets were fired.

The "Smith" and "Jones" division of the parade caused the crowds to laugh heartily—there were 200 Smiths in line and more than 100 blessed with the name of Jones.

The Staff will return this evening, and it will then be known whether they were successful in winning any of the prizes offered for the best drilled team.

Twenty members of the staff arrived from Indianapolis this morning bringing back glowing reports of the First degree drill, as put on at 7:30 Thursday evening, by the Imperial Degree Staff.

The Grand Master expressed himself that this staff has a "running chance" for the prize. He made the statement that he had seen lodge work all over the United States and in Canada and had never seen finer degree work in his life."

The drill as put on by the Imperial Degree Staff drew the most deafening applause of the evening and one of the judges said it was the first degree staff that had had real music and went up to Mr. Frank Horstman and personally congratulated him upon his splendid march music.

The largest crowd of the encampment witnessed the degree.

THE STORY OF THE HANDS.

There will perhaps be a different kind of care of the hands since Dr. Holmes, the psychologist of the University of Pennsylvania, in addressing the Delaware County Teachers' Institute, said:

"The hands of an imbecile or mentally deficient person are almost always smooth, with a pink skin like that of a baby, and when the hand is allowed to relax the fingers assume a straight position. Sometimes the fingers are short and stumpy and have bumps on them, although they may never have been used used to manual labor."

Providing some of the ladies, both young and old, who now spend so much time which could be employed in vastly more important pursuits of life, in doctoring up and preserving their hands, take stock in the Holmes' theory, there will be less time wasted on the preservation of hands in the future.

Dr. Holmes goes even farther in his statement and boldly asserts if a child uses its thumb and fingers in picking up a pencil or other object, it is normal. If a child, in grasping a bar to pull himself up, places his thumb on the opposite side of the bar, he is normal; but he is deficient if he puts the thumb on the same side with the fingers, as monkeys do.

So we learn from Dr. Holmes that science has come to regard what the great middle classes have long recognized, and that is, that after all the soft, smooth hand with skin so thin that the pulsating blood gives it a pinkish hue, the hand so prized by its possessors and envied by the idlers and would-be idlers is not, after all, the real thing.

Long before scientific men, as such, made the discovery announced by Dr. Holmes, real aristocracy—the backbone of civilization, the people who do things—regarded the strong, firm hand which showed that it had been used, as the proper hand.

The hand that shows the wear in behalf of its possessor and in behalf of humanity in general is the normal hand.

The soft, pinkish hand, made so and kept so by reason of non-use, is the hand of the morally deficient and physically inactive human being who serves no useful purpose in the advance of mankind.

The mental deficiency which science has now announced is perhaps more of cause than effect.

The general run of people have long recognized the latter and science is just recognizing the former.

Any way if the statement of Dr. Holmes becomes generally accepted the pink, soft hands will not be so prized and coveted as formerly.

Justice Hard to Dispense Where Human Woe and Misery Exist

By CHARLES NAGEL, Secretary of Commerce and Labor

A MAN who daily faces the record of HUMAN WOE, of HEARTACHE, of MISERY, and sometimes of brutality to be found at Ellis Island, the immigrant station of New York, rises, if he rises at all, to heights of earnest desire to ameliorate the conditions of HUMAN SUFFERING with an intensity that is unknown to those who make sweet mouthfuls of "social betterment" and kindred phrases in feeble attempts to help without perceiving the cause.

The sights we see at Ellis Island and the aspects of life which that great concourse of all nations presents in the way of PATHOS, MISERY, TRAGEDY and the agony of despair Kipling could not describe. No artist can paint such a picture, and those who are safeguarded in the COMFORT AND PROTECTION OF HOME and friends can but very imperfectly realize it.

WE SUFFER CRITICISM FROM TIME TO TIME IN DIRECTIONS AND TO DEGREES THAT ARE WHOLLY UNDESERVED. MY GREAT REGRET IS THAT THE CONDITIONS ARE NOT FULLY UNDERSTOOD. OUR MEN ARE OFTEN DESCRIBED AS BEING COLD HEARTED IN THE DISCHARGE OF THEIR DUTIES, BUT WE KNOW DIFFERENTLY.

While no man can safely wear his heart on his sleeve, the innumerable cases where inspectors go FAR OUT OF THEIR WAY to make admission possible, to be blind to unimportant facts, to be deaf to some answers, to make up deficiencies by subscriptions and similar discretionary discharges of kindly offices—all these serve to prove beyond a shadow of a doubt that a spirit of tender heartedness pervades the service and that the dispensation of justice is well tempered with mercy.

POETRY FOR TODAY

SEPTEMBER SHOWERS.

A fringe of cool, untainted blue, white-capped with lazy clouds

A bit of breeze from nor-west way, a scurrying of crowds,

A startled laugh from women's lips, a patterning of feet,

A mirror made from granitoid adown the city street,

Where, all reversed, fantastic dance to music of the rain

The satin slipper and the boot, the pampered and the pain.

A breath of ozone from afar, and ribbons fluttering free,

White skirts a-beating in the breeze like summer sails at sea,

Newspapers spread, protecting hats, umbrellas all a-drip,

While here and there unwilling wilts a luckless ostrich tip.

But never mind, what care we though such gaudy trifles fade?

For cooling of the torrid air September showers were made.

A sudden passing of the rain, the fleeing feet are checked,

No longer cool, the fringe of blue with moveless clouds is flecked ed.

The bit of breeze from nor-west way with chiffon toys no more,

The satin slipper and the boot move decorous, as before,

The mirror luster quickly fades from off the walk, and then, September shows the cloven hoof—and it is hot again.

A GREAT ADVANTAGE TO WORKING MEN.

J. A. Maple, 125 S. 7th St., Steubenville, O., says:

"For years I suffered from weak kidneys and a severe bladder trouble. I learned of Foley Kidney Pills and their wonderful cures so I began taking them and sure enough I had as good results as any I heard about. My backache left me and to one of my business, expressman, that alone is a great advantage. My kidneys are free and normal, and that saved me a lot of misery. It is now a pleasure to work where it used to be a misery. Foley Kidney Pills have cured me and have my highest praise." Blackmer & Tanquary

GOING WEST GOING EAST

Editor Answers Judge Grosscup

Says He Will Do Nothing to Hinder Resignation.

New York, Sept. 22.—Judge Peter C. Grosscup of Chicago will find no magazine opposition to his retirement from the federal bench. Following a statement made by him that he intended to resign, the judge issued a supplementary proclamation in which he said that he did not intend to quit under fire. He added that Lawrence Ritchie, a former executive of the secret service, had been trailing him for two years, and that a magazine publication was to be based upon the Ritchie investigation. In the face of this condition the judge insisted that he would not quit.

Trumbull White, editor of Everybody's Magazine, admitted that Ritchie had been employed at various times by his magazine. But he added: "Considering the matter purely in the light of academic philosophy, I should think that if a magazine had a publication to make concerning Judge Grosscup, or contemplated a forthcoming publication, and if such publication or announcement would result in keeping Judge Grosscup on the bench, the latter fact would be the best possible reason for making neither the announcement nor the publication."

Mr. White would not discuss what, if any, manuscript concerning Judge Grosscup had been submitted to his office. He merely contented himself with the assertion that, as a matter of deference to the public welfare, if he had such an article and knew it would result in retaining Judge Grosscup on the bench in event of publication, he would not publish it.

FARMERS WOULD OUST EXPENSIVE MIDDLEMAN

Ask Aid of Mayor Gaynor in Getting More for Both Producer and Consumer.

BY Associated Press to State Journal.
NEW YORK, Aug. 31.—Sixty Pennsylvania farmers, representing \$2,500,000 in the soil of that state, today called on Mayor Gaynor and explained to him why they believe that the unnecessary middleman should be done away with in this country, and directly by the farmer to the consumer. The delegation is here to work out the co-operative scheme of how this may be accomplished.

Patrick Egan, former minister to Chile, as chief spokesman, presented his views to show why the farmer gets so little and the consumer pays so much. He declared that the farmers and consumers have been mulcted and in proof of this continued:

"I have but to state that the potatoes for which the consumer paid \$60,000,000 last year netted our farmers less than \$5,500,000. Cabbages which sold in this city for \$9,125,000 brought the farmers \$1,800,000 and milk which sold to consumers for from \$48,000,000 to \$49,000,000 brought the farmer \$23,000,000."

This town is fortunate in that it has been chosen as one of the many stations of the Wear-Well Shoe Co., which eliminates from this community the many unnecessary profits from Factory to Foot.

Madrid, Sept. 22.—Reports give the impression that the revolution and labor movement in Spain is at an end. The failure is the result of the flaring of martial law. The authorities have seized a complete list of the revolutionaries and it shows the existence of a carefully prepared anarchist plot which the strikes were intended to bring to a head.

Revolutionary proclamations to the populace have been discovered. The plan of the revolutionaries was to attack the convents, barracks and public buildings. They had a stock of bottles filled with explosives and were plentifully supplied with money.

President Speaks In Illinois Today

(Continued from Page One, Column 2.) They are. There was not any trick about it. The cards were laid on the table.

"They said we want to annex Canada-huh!"

Have Our Own Troubles.

"Gentlemen, my experience in this government has taught me that we have territory enough without enlarging our borders. Canada is our good neighbor and along that border line of miles there is not a gun or fort or a battleship worthy of the name. They have their troubles; we have our own. I can say for one that the talk of those outside who say that the trade treaty was to facilitate annexation is bosh."

Then the president, remarking that he knew the saying that only a fool prophesies, told them that nevertheless he wanted to register a prophecy with regard to reciprocity. "I want to prophesy," said he, "that in 18 or 15 months, and that will be before the next general election, the effect of reciprocity, so far as the business of the farmer is concerned, will be so slight that it will form no part at all in the issue in discussion." The president said that for himself he might have the privilege of tearing down every custom house on the Canadian border and to give the two countries free trade.

At Grand Rapids, President Taft made a detailed defense of his veto of the Democratic tariff bills. He rested his entire case on the foundation that this administration is committed to the revision of the tariff scientifically, through the tariff board. He criticised the methods of congress in passing the bills revising the wool bill, making additions to the free list and revising the cotton schedule.

"If I had allowed the wool bill to become a law," he said, "the progress made toward a better method of revising the tariff would have been entirely lost and the policy thrown to the winds."

Naps Win Easily Coming Fast

Mitchell, Left-Handed Pitcher, Effective Against New York.

New York, Sept. 22.—Mitchell, a left-handed pitcher, pitched first-class ball for the Cleveland at American league park, and at no stage of the proceedings were the Highlanders dangerous. The Naps showed real championship caliber. They hit the ball cleanly and hard, knocking Quinn out of the box in the sixth inning, and in the field they accepted everything without an error.

FORMER WASHINGTON BOY HARRY L. LANUM MAKES CHANGE IN BUSINESS

Mr. Harry L. Lanum, brother of Dr. C. V. Lanum of this city, and for the past 16 years engaged in the banking business at Columbus, has announced a change of his vocation and The Ohio State Journal, this morning contains the following mention of that fact in its columns devoted to business:

"Harry L. Lanum, assistant cashier of the Union National bank and one of the best known young bank men of the city, resigned his position with the North High Street financial institution and will take a position with the Wolfe Brothers' Shoe Company in a traveling capacity.

Mr. Lanum has been in the banking business for a quarter of a century, having started his career with the Peoples' and Drovers' Bank in Washington C. H. He came to Columbus 16 years ago and entered the service of a bank on the same corner in which the Union is now located. He has been assistant cashier of the Union National Bank since 1904 and has made an excellent reputation in the position."

WHY HESITATE?

An Offer that Involves No Risk for Those Who Accept It.

We are so positive our remedy will completely relieve constipation, no matter how chronic it may be, that we offer to furnish it free of all cost if it fails.

Constipation is caused by weakness of the nerves and muscles of the large intestines or descending colon. To expect a cure you must therefore tone up and strengthen those organs and restore them to healthier activity.

We want you to try Rexall Orderlies on our guarantee. They are eaten like candy, and are particularly ideal for children. They act directly on the nerves and muscles of the bowels. They have a neutral action on the other organs or glands. They do not purge or cause any inconvenience whatever. They will positively overcome chronic or habitual constipation and the myriads of associate or dependent chronic ailments. Try Rexall Orderlies at our risk. Three sizes, 10c., 25c. and 50c. Keep the City Clean Little Typhoid Results

Contagious diseases, due to uncleanliness of the city, and the existence of unsanitary conditions, has been so nearly eliminated this year that the non-existence of disease has been the subject of considerable comment.

The greater purity of the city water, more sanitary condition of vaults, stables, and bandonment of old wells are some of the reasons advanced for the scarcity of typhoid fever and other diseases of like nature. However the war on flies is claimed by some to be the direct

cause, as the flies have been fewer this year than ever known, probably due to the millions being caught in the public fly traps, and the elimination of their breeding places. Also the war on mosquitoes by pouring crude oil upon the stagnant pools which formed breeding places for the disease carrying insects.

The efforts of the Health Board in the early part of the season are being made manifest in the prevention of sickness and the saving of lives.

The danger of an outbreak of typhoid fever this year is now but scant.

THIS display of new styles in men's clothes which we're now making is the kind of display you want to see. It represents the highest achievement in fine clothes making.

Hart Schaffner & Marx use none but all-wool fabrics. And the reason for that is that all-wool is best; it's best for the man who wears the clothes. The tailoring is of the highest class. Costs more than cheap tailoring, just as all-wool costs more than part cotton. Everything in these clothes, and everything done to them, is with the idea of giving the man who wears them the best possible value for his money.

That's the spirit in which **Hart Schaffner & Marx** make clothes. And the reason we sell these goods, and make so much talk about them, is that this store is being run on that basis.

See the new weaves—grays, tans, browns, blue-grays; cheviots, tweeds, worsteds, blue serges. See the new models—Shape-maker, Varsity, English Sack. And the new Overcoats—Raglan Slipon, English Box Overcoat, Adjustable Collar Ulsterette, and a lot of other good ones.

GRANDMOTHERS USED SAGE TEA

To Darken the Hair and Restore Gray and Faded Hair to Its Natural Color.

It is easier to preserve the color of the hair than to restore it, although it is possible to do both. Our grandmothers understood the secret. They made a "sage tea," and their dark, glossy hair long after middle life was due to this fact. Our mothers have gray hairs before they are fifty, but they are beginning to appreciate the wisdom of our grandmothers in using "sage tea" for their hair and are fast following suit.

The present generation has the advantage of the past in that it can have a ready-to-use preparation called Wyeth's Sage and Sulphur Hair Remedy. As a scalp tonic and color restorer this preparation is vastly superior to the ordinary "sage tea" made by our grandmothers.

This remedy is sold under guarantee that the money will be refunded if it fails to do exactly as represented.

AMERICAN WORM FINALLY TURNS; LONDON SUFFERS

Tired of Being Robbed
Travelers from States
Avoid Metropolis.

LONDON, (Spec.)—James Douglas tells so well in "London Opinion" why the current season in London has been a failure thus far that it isn't worth while to give any explanation but his.

"It's a long worm," says Mr. Douglas, "that has no turning. The American worm has turned at last. For a long time the American worm has rejoiced in the fact that he possessed the most expensive accent in the world. He gloried in the knowledge that a nation which speaks through its nose must pay through it. The plunder of Americans became a European habit.

"For many years the whole of Europe tried to discover the last straw but the American back never broke. There never was so cheerful a camel in the whole annals of camels. It was a camel that seemed to be everlastingly looking for the last straw and making up its mind that there was no last straw.

"But there was. The American camel has struck against the last straw before it left New York. The coronation straw, indeed, was a big stick rather than a straw. London is a very shrewd, businesslike old lady. She counted the cost of the coronation. Then she calmly decided to make Americans pay the bill. Unfortunately the American worm got wind of the plot. The American worm made up its mind to miss London this year.

"What is the consequence? London is suffering from an American famine. The Americans are not here. They are scattered all over the continent doing their coronating by kinematograph. The London hotel-keepers and shopkeepers are tearing their hair. One of them told me that the coronation was worse for trade than the King's funeral. 'It has ruined us,' said the poor man. 'The Americans have been scared away.' All this was the price paid for greed.

"The Americans are willing to pay reasonable prices but they are tired of being sheared. If they wish to go into bankruptcy they can go into it comfortably at home. I know it is vexatious to allow an American to take any money with him, but we ought to temper business with mercy.

"I am sure it is bad policy to blackmail our guests. It would be good business to make Americans feel that London is the cheapest as well as the finest city on earth. If we persist in skinning the Americans they may be forced to take lessons in English elocution. At present our prices rise automatically at the sound of nasal twang or a melodious drawl. Some of the penny-in-the-slot machines indignantly refuse to work for Americans for less than half-a-crown. For my part, I think this is going too far. Half a dollar in the slot ought to suffice."

All of which—from an Englishman—is very instructive reading, considering that the English press has been referring to the American correspondents in London as worse than Ananias for warning their newspapers in advance that Americans who came to London for the coronation would be blotted.

OUR FRIENDS WHO WEAR WELL

We can all call to mind people of whom it is said "they wear well" with their friends, and we may be sure that a woman whose popularity is of this durable kind is not the one who kisses an acquaintance goodby the first time she calls upon her, or who compliment her and gushes over her gown, or her hat, or her pretty complexion.

Many women please at first sight, and for a short time they seem to be perfectly charming, but after a while they feel so well acquainted that they either become unpleasantly familiar or else wholly cease to try to be agreeable.

The woman who wears well is seldom beautiful to look at. She is always unselfish, cheerful, and if she has griefs or troubles, as very often she has, she does not parade them on every occasion.

It is a pleasure to possess such a friend—mild and unobtrusive, yet constant and possessing a genuine and satisfying beauty.

A dear old lady who was lately staying near Dartmoor was very much exercised in her mind as to the physical and spiritual health of the convicts confined in the prison.

Meeting a squad one day, she asked the warden in charge if she might present them with some delicacies she had with her and a few tracts. The Warden, as was his duty, replied in the negative. Then she pleaded to be allowed to speak one word of admonition and comfort.

"No, ma'am," said the warden. "It is against the regulations."

"Oh, dear, dear," sighed the old lady, "but tell me, do you think they are all converted?"

"Well, ma'am, I shouldn't take upon myself to say that," he answered. Then seeing her distressed face, he added: "But there's one thing I will say for them; they're all teetotalers non-smokers."

And the old lady departed much comforted.—Tid-Bits.

First Grand Prize

\$600 Schaff Bros. Player Piano

This beautiful Player Piano will be given to the person having the largest number of votes in the Register-Herald's Great Voting Contest, and was bought of J. A. Smalley, who has the instrument on exhibition at his storeroom on West Court street, next door to the T. C. DeWeese Photo Gallery. A cordial invitation is extended to all to call and examine this beautiful prize.

This player piano carries with it an unlimited warranty and is the most simply constructed player on the market, one lever acting for the tempo, start, stop and rewind, making it possible for a child to operate it and play any style of music, from ragtime to the most classical.

The tone of this instrument, its volume of sound and artistic workmanship have earned for it the distinction of being one of the finest player pianos ever brought into Fayette county. Call at Smalley's store on West Court street and examine this prize.

2nd Grand Prize

\$265 Link & Son Piano

This piano, also made by the Schaff Bros., of Chicago, Ill., and Huntington, Ind., has no equal on the market for the price. The people making this piano have been located in Chicago since the year 1868, since which time their financial rating has been unsurpassed by any of their competitors. They were the first firm to make upright pianos in Chicago after the great fire of 1872, and a steady improvement has marked the quality of their product ever since.

This piano was purchased from J. A. Smalley and is on exhibition at the storeroom next to the DeWeese photograph gallery. The many excellent features of this instrument, combining a double veneered maple-lined mahogany case, light, perfectly balanced and sympathetic action and soft mellow tone make it one that anyone who is a lover of music would be proud to own.

DISTRICT FIRST PRIZE

\$125 Diamond Ring

This ring was purchased at the store of C. A. Gossard & Co., who guarantee it to be a pure and flawless stone. If C. A. Gossard & Co. added not one word of assurance, this beautiful little gem would speak for itself.

The perfect color, correct cut and proportion give it the scintillating brilliancy that comes only in the perfect stone. It is a gem no better than which adorns the hand of royalty—it is a prize that any young lady may well strive for.

To the energetic woman who wins it, this beautiful gem will be as a legacy in the bank. Its value is eternal and can never grow less. The person who wins this prize is not required to take the ring which we have selected, but CAN HAVE THE CHOICE OF ALL \$125 DIAMONDS in the store of C. A. Gossard & Co.

DISTRICT SECOND PRIZE

\$75.00 Diamond Ring

This stone, purchased of W. H. Hettesheimer, Jeweler, is not quite as large as the diamond offered as the District First Prize, but it a good sized gem, perfect in color and absolutely flawless. It has a Tiffany setting, and will make a splendid prize for some worthy young lady.

W. H. Hettesheimer guarantees this ring to be exactly as it is here advertised, and the person who wins it can have their CHOICE OF \$75 DIAMONDS IN HETTESHEIMER'S store.

Young ladies, here is a chance to secure that coveted diamond. Perhaps you may never have the opportunity of getting another. Some person is going to be the proud possessor of this valuable prize. Why not you? It will not cost you a cent.
